food production in line with environment, without use of pesticides, moderate animal production, regional, and affordable

Respondent ID 336

A food system characterised by local food markets, organic farms, conscientised consumers, with alliances between farmers and consumers, democratic decisions based on resilience goals.

Respondent ID 341

all the activities and elements which contribute to a fairer, agroecological and healthy production, transformation, distribution and consumption of food

Respondent ID 350

A series of tasks whose final objective is to produce food items in which human and ecological health is the main priority.

Respondent ID 352

good health, environmentally friendly and socially responsive system

Respondent ID 354

It is about food production system that relies on ecological processes such as decomposed organic matter (humus) rather than the use of any chemical in its production and processing.

Respondent ID 364

A healthy system that is inclusive, does no harm to the planet, promotes sustainable processes.

Respondent ID 371

The only way to deliver healthy, food in a sustainable food system to save the living earth as a pleasant environment

Respondent ID 380

What is Organic Food System for you?
Outcomes
Improved human health

A system that is safe, healthy, and regenerative for people and planet (animals, plants, ecosystems, air, soil, water). A system that helps to transform problems experienced by humans and the natural world. A system that re-weaves human-nature connection

Respondent ID 129

the best food system for people and planet

Respondent ID 179

It is a holistic approach for production and consumption of safe food

Respondent ID 186

the food system where we are able to have safe food with trust , transparency, and give us a nutritional healthy environment for the human, ecological and animal welfare

Respondent ID 238

providing nutritional food grown in unison with nature to improve human health, build a sustainable environment while providing a living wage to all involved in the production and distribution

Respondent ID 248

Organic food system provides a delineated food system that can be explored for its potential contribution to sustainable diets.

Respondent ID 268

Organic Agriculture is a production system that sustains the health of soils, ecosystems and people. It relies on ecological processes, biodiversity and cycles adapted to local conditions, rather than the use of inputs with adverse effects.

Organic Agri

Respondent ID 303

An organic food system is a combination of actors and activities that enhances along the global food chain better health and environment through economic activities, education and partnerships.

Respondent ID 313

Food which is safe and fit for people in each region, which is free from toxins and adulteration.

Respondent ID 329

Ensuring food security and food safety of the community, the nutritional skills of families, how to allocate funds to provide the best available food and how to share food in the family.

Respondent ID 335

A series of tasks whose final objective is to produce food items in which human and ecological health is the main priority.

Respondent ID 352

good health, environmentally friendly and socially responsive system

Respondent ID 354: 1 - 1 (0)

healthy food

Respondent ID 355

The only way to deliver healthy, food in a sustainable food system to save the living earth as a pleasant environment

Respondent ID 380

What is Organic Food System for Where we can choose freely and where it is available for all

Respondent ID 133

A holistic approach to humanity. An end to hierarchy. Land reclamation. Food sovereignty. Freedom. Love. Access to land, for leisure and growing.

Respondent ID 140

A system that respect the environmental, the human welfare, equitable and with food sovereignty.

Respondent ID 187

Agroecology and food sovereignty. Organic in Latin America is often mainly related to third-party certification (mostly used by producers and their organizations for export)

Respondent ID 188

Production of herbs and spice in the organic and biodynamic system for local consumption and export to EU countries

Neue Dokumentgruppe\235

I value ecosystem health. I want to steward my land such that it's healthier every year than it was in the last. I grow certified organic produce that is sold directly to customers, and also to retailers and restaurants. I'm proud to offer my community

Respondent ID 244

Responsible and accountable OFS should be 'farm to fork' 'production to process to consumers at each stage', ' a livelihood with common goals to protect lives and environment' 'A socio-development in all regions '.

Respondent ID 245

A food system that is environmentally and socially sustainable. One where local communities support the production and sale of in-season fruit and vegetables by multiple small farmers.

Respondent ID 249

Ensuring food security and food safety of the community, the nutritional skills of families, how to allocate funds to provide the best available food and how to share food in the family.

Respondent ID 335

food production in line with environment, without use of pesticides, moderate animal production, regional, and affordable

Respondent ID 336

A System that involve all the actors of the system, from farmers to consumers, with respect of IFOAM Principles. Producing enough food for each actors, with transparency and equity.
